

The **Cyrus 6 DAC** is a high quality amplifier offering 40 watts of power per channel. It uses advanced DAC technology to convert the digital music signal into food for your speakers.

The amplifier even lets you play one source in one room and another in a second room.

Its powerful onboard software system allows the customization of many features including individual input sensitivity matching and multiple display modes.

At the heart of the **Cyrus 6 DAC** is a revised power supply which takes advantage of some cutting edge components, allowing the **Cyrus 6 DAC** to deliver remarkable performance for such an affordable amplifier. The new power supply design provides enormous peak power output (190W peak power into a 1 Ohm load) allowing the resulting performance to compete with amplifiers of double its conservatively rated 40W RMS specifications.

The **CD t** and **Stream X2** are perfect system partners to take advantage of the expert engineering of the **Cyrus 6 DAC**.

## Cyrus 6 DAC

As with all of our products, the **Cyrus 6 DAC** can be connected to our other systems via our unique **MC-BUS** connectivity.

Inputs – 6 analogue, 2 electrical SPDIF, 2 optical SPDIF, 1 USB (computer slave)

Sample rate compatibility – digital input: 24-bit/192kHz; USB: 16-bit/48kHz

Outputs – Zone 2, preamp out, headphone, bi-wire loudspeakers

Power supply – 130VA transformer

Power output – 50W per channel into 4 ohms; 40W per channel into 8 ohms

Dimensions (H x W x D) – 73 x 215 x 360 mm

Weight – 5g
