

Nucleus Micro

the original designer speaker

There are numerous loudspeakers capable of producing fine sound, unfortunately most are too large, unattractive or power hungry to operate in many modern living spaces. That's what makes the Nucleus Micro different: a 4" diameter, all-metal sphere, available in a choice of eight finishes. The Nucleus Micro produces a vast soundstage and pinpoint imaging, in a beautifully small, visually attractive package. Hi-Fi, Home Cinema or Multi-Room; with Nucleus Micro the choice is yours. With a range of matching [subwoofers](#) available and an array of [mounting options](#), it's easy to configure a Nucleus Micro system to fit your home and aspirations.

Imagine a truly high-end loudspeaker that fits in the palm of your hand. A speaker that comes in a palette of colours to complement any room – from simple matt black to striking polished stainless steel (and six other colours and finishes in between).

Nucleus Micro is flexible too. With a choice of four mounting options available, a Micro can be positioned just about anywhere. On a wall using the [Micro Wall Bracket](#) (in black or white), on any flat surface with the [Micro Table Mount](#) (in black or white) or simple 'Isolation Ring' supplied, or what about the ultimate Micro mount – the elegant [Wallflower stand](#) (available in black, white or stainless steel).

By choosing a sphere, the strongest possible shape, we have eliminated internal resonance and external diffraction, the two main causes of loudspeaker distortion. Our patented [S2 technology](#), enhances low frequencies that go way beyond conventional satellite speakers. By using our 3" full-range driver and by eliminating the crossover, the Nucleus Micro is endowed with spatial characteristics unsurpassed by any other loudspeaker, regardless of size or price.

Specifications

Frequency Response	80Hz to 18Khz
Sensitivity	89 dB/w
Nominal Impedance	8 Ohms
Power Handling	100 Watts
Height on WallflowerT Stand	36"
Driver	3" full range
Crossover	None
Dimensions	4" Sphere
Weight	795g
Cone Material	Mical Polypropylene Compound
Enclosure Material	Mild Steel
Warranty	5 Years Parts and Labour
