

Droplet CDP5.0 Full Balanced Tube CD Player

Color Option

You are invited to audition the latest Chinese phenomenon that has taken Europe and US by storm, winning 4 awards to date and still counting. Droplet CDP5.0, the best product of 2006 granted by Image hifi in Germany, was reviewed as analogue like in character. It has been ranked over any other \$4000-\$5000 CD player by some European reviewers and was given the coveted Blue Moon award in the US. All these placed the Droplet CDP5.0 ahead of their class once again.

Check out [more views link](#), the marble stand shown in the left picture which has been available for special order since March 2006. This is the similar stand that sits beneath the Droplet 5.0 Turntable. Constructed from two slabs of polished pale marble separated by massive triangular sections and supported by anodized-alloy columns - all tensioned by threaded rods running through the structure. The shape of the marble echoes the curves of the Droplet 5.0 CDP, with the columns directly beneath the cones on the base of the CD player turns the superb Droplet into a real work of art.

Specification :

DAC resolution: 24bit 192KHz multilevel sigma-delta with synchronous upsampling
Clock Jitter: Less than 14ps directly distributed to DAC
0dBFS signal output: 2.3V RMS (RCA) / 4.6V RMS (XLR)
Output Terminals: Gold plated Tube RCA unbalanced and gold plated XLR balanced
Frequency response: Less than +/- 0.1 dB deviation 20Hz-20kHz
Phase response: Less than 2 degrees deviation 20Hz-20kHz
Signal-to-noise ratio: More than 115dB (XLR output)
Signal-to-noise ratio: More than 100dB (Vacuum tube RCA output)
Crosstalk: Less than -100dB
Distortion (XLR): Less than 0.002%
Distortion (RCA): Less than 0.015%
Intermodulation: Less than 0.002% (19kHz + 20kHz)
Remote Control: Philips RC-5 compatible IR system 36kHz modulation frequency
Vacuum tube: Sovtek 6H30 x2
Dimensions: 51cm x 43cm x 14cm (HxWxD)
Weight: 30kg
