

# The Di150

## Di150 Dual Mono Integrated Amplifier

### Power and Control

It's really simple. With the sonic and technological heritage from our top range, this integrated amplifier is bound to take your breath away. The design, the price tag and the reviews of this thing are all nice and friendly, but the performance is awesome with a true-to-concert power potential and a frightening grip on all aspects of the musical experience.

### Features

Two balanced and four unbalanced input and a home theater inputs option, that enables the Di150 to be used with a surround processor. It will put an end to compromise and deliver the same renowned high end quality sound in your front speakers, as you have when listening in stereo.

To complete this versatile amplifier we equipped it with both balanced and unbalanced line outputs, allowing further external power amplifiers for bi-amping or multiroom application. The GamuT speciality; the single Mos Fet output stage built around industrial transistors capable of more than 400 amps!

The power supply of this discreetly looking amplifier is made with fast delivery and high bandwidth in mind. With approx. 1000Watts of transformers and four beer can sized capacitors with a total of 64.000uF in capacity, this direct wire-connected supply is the oversized heart of the beast.

### Specifications

Continuous output power	2 x 180 @ 8 ohm 2 x 380 @ 4 ohm
Frequency response	20-25kHz +/- 0.1dB
Noise level	100dBA below 100W @ 8 ohms
THD (1kHz)	>0.05%
Speaker load	>1.5 Ohms
Input impedances	Balanced inputs 40kOhms
Idle power consumption	100 Watt
Shipping weight	32 kg

*Specifications subject to change without notice*
