

DAC-10H

The NuPrime DAC-10H is a DAC & Headphone Amplifier offering PCM 384K & DSD256 decoding. The DAC-10H's balanced headphone amplifier is capable of driving headphones in balanced and single-ended configuration and can be used with up to two dynamic headphones. With five digital & two analog stereo inputs, the DAC-10H is a full-featured DAC and preamp more than suited for any high-end system.

1. Fully integrated DAC & Headphone Amp offering PCM 384K & DSD256 decoding.
2. Accommodates all digital signal formats.
3. Capable of driving headphones in balanced and single-ended configurations and can be used with up to two dynamic headphones.
4. A full-featured DAC and a preamp suits for all high-end systems.

Inputs:

- (1) USB Digital
- (2) Coaxial Digital S/PDIF
- (2) Optical Digital S/PDIF
- (2) Analog Stereo RCA

Outputs:

- (1) Optical (up to 24 bit/192 kHz)
- (1) Stereo RCA (Line out)
- (1) Stereo Balanced (XLR-3 socket Preout)
- (1) Balanced headphone amplifier (XLR-4 socket)
- (1) Unbalanced headphone amplifier (6.5 mm jack socket)

• Frequency Response:
10Hz to 80kHz

• THD+N:
< 0.0003%
