

Sonus faber

Venere 1.5, the 2 way bookshelf.

[+ Wishlist](#)

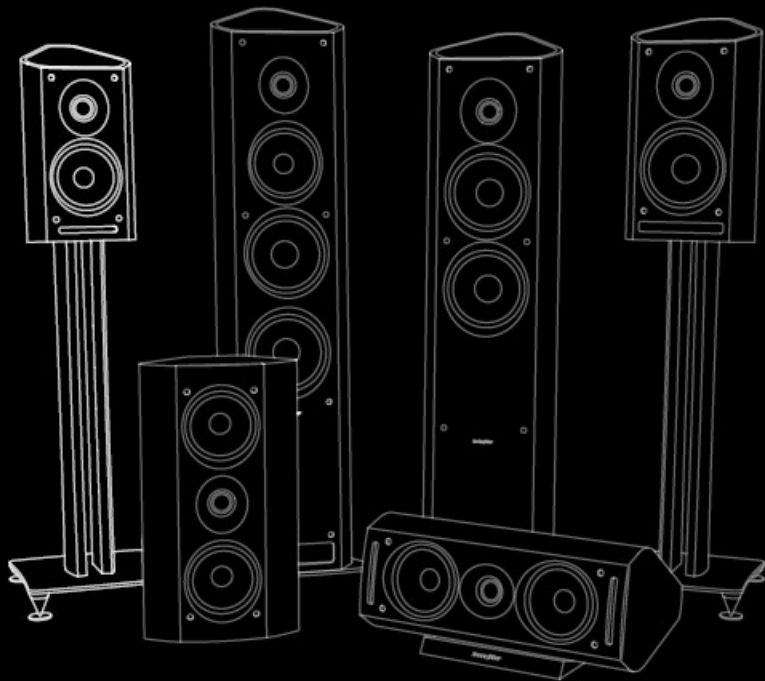

Venere 1.5 is a bookshelf speaker with its own stand and characterised, like all models in the entire line, by the Lyre shape. Also for this model, the particular construction of the cabinet, a tribute to our flagship Aida, provides a solution to the problem of internal spurious resonance and gives a rear aerodynamic profile which prevents criticality with the wall behind the speaker.

Technical features.

The front positioning of the reflex conduct also makes placement in the environment even easier and enhances the potential of the drivers (one mid-woofer with a Curv™ cone and a 29mm tweeter with silk dome created by DKM) thus generating sound that is fresh, fast and always very exciting. The sloping front baffle, featuring curved lines, allows for perfect timing and effective 'dialogue' between the drivers, always ensuring an enthralling listening experience.

Particular attention was given to the stand, with a tempered glass base and its adjustable aluminium feet, it confirms its belonging to the Venere family, providing fluidity of style but also functionality: the feet allow for the effective coupling to the floor, producing sound that is even cleaner and more vivid. This 2 way, like all members of the Venere family, is easy to use and suitable for placement in a variety of 2 channel, multi-channel or home theatre environments.

TECHNICAL SPECIFICATION

LOUDSPEAKER SYSTEM

2 way standmount bookshelf vented box

DRIVE UNIT

Tw 29 mm dome (silk)
