

A dedicated streaming source, the **Stream X2** is a fantastic foundation for a hi-fi system with a DAC and amplifier. Use its host of digital inputs to play the latest highest resolution 24-bit music files and discover new levels of detail and energy in your music.

Use it with a DAC enabled preamplifier such as the [Pre Qx DAC](#), integrated amplifier such as the [Cyrus 8 DAC](#), or for the purest output partner the **Stream X2** with our flagship [DAC X Signature](#).

If you love radio, you'll love TuneIn radio. This fabulous internet radio service provides access to over 70,000 stations from around the globe! You can create pre-sets, search for stations currently playing your favourite songs or just start listening instantly. With a massive choice of global stations covering all genres and real DJs selecting the tunes, you'll quickly discover music and stations you love.

The intuitive n-remote which is available to purchase with the **Stream X2** is really enjoyable to use. With a colour LCD screen, you'll be able to browse music and radio in style, and save favourites for easy access next time. The n-remote is also able to control other items in your house - learn [how to add an IR device to your n-remote here](#).

The **Stream X2** is compatible with UPNP and DNLA products.

As with all of our products, the **Stream X2** can be connected to our other units via our unique **MC-BUS** connectivity.
